ABOUT ME

Master's-educated computer science educator with a deep understanding of contemporary educational methodologies and computer science teaching practices. Dedicated to implementing a constructivist approach in the classroom, where students are actively encouraged to engage in problem-solving, critical thinking, and hands-on learning. By bridging academic pedagogical knowledge with practical engineering experience from the tech industry, my goal is to provide students with up-to-date, applicable skills, enhance their digital literacy, and inspire them to pursue further growth in the field of technology.

PERSONAL ATTRIBUTES

- **Communication & Empathy:**
Strong skills in clear self-expression, active listening, and patience when working with children and youth.
- **Leadership & Organization:**
Proven ability to lead groups, with a systematic approach to maintaining pedagogical documentation and planning instructional activities.
- **Flexibility & Adaptability:**
Quick adaptation to classroom dynamics and unforeseen situations within the teaching process.

LANGUAGES

- English: Intermediate (B2)
- Italian: Elementary (A2)

EDUCATION

Master of Arts (M.A.) in Education for Vocational IT Subjects

University of Kragujevac, Faculty of Technical Sciences | 2025 - 2026

- Focus: Intensive study of educational psychology, child developmental psychology, and computer science teaching methodology. Specialized focus on constructivism in education, modern instructional technologies, creating inclusive learning environments, as well as advanced methods of student evaluation, testing, and grading.

Master of Science (M.Sc.) in Information Technology

University of Kragujevac, Faculty of Technical Sciences | 2024 - 2025

- Focus: Web mining, advanced algorithms and modeling techniques, software quality management, Human-Computer Interaction (HCI).

Bachelor of Science (B.Sc.) in Information Technology

University of Kragujevac, Faculty of Technical Sciences | 2020 - 2024

- Focus: Object-Oriented Programming (OOP), databases, mobile and web application development, information systems administration.

TEACHING & WORK EXPERIENCE

Computer Science Teacher (Internship)

"Dr. Dragiša Mišović" Elementary School, Čačak | April 27, 2026 - June 15, 2026

- Prepared and delivered lessons in specialized IT subjects (programming and computer applications).
- Independently conducted classes and implemented curriculum units for 6th-grade students in Python programming (Turtle graphics).
- Created detailed lesson plans in compliance with the official curriculum of the Ministry of Education.
- Adapted teaching materials to accommodate various student learning levels and applied both formative and summative assessments.
- Mentor: Ivana Zorić
- Key Takeaways / Skills Acquired: Classroom management, maintaining student engagement, and implementing interactive teaching methods (quizzes, group work).

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Legacy Responsive Web Design v8

freeCodeCamp (2026)

Advanced training in web design and responsiveness.

- Microsoft Excel, VBA & SQL Programming

Kamster d.o.o. (2025)

Enhancing advanced data administration skills, directly applicable to informatics instruction.

- Microsoft Power BI

Kamster d.o.o. (2024)

Data analytics and visualization.

Software Developer & Frontend Programmer

Docus & Croonus | 2024. – Present

- Relevance to Teaching: Working within the real-world IT sector on application development (Angular, Node.js) and databases allows me to move beyond theoretical teaching. It enables me to provide students with direct, practical insights, agile workflows, and the actual technical standards required in today's tech industry.

INSTRUCTIONAL & PROFESSIONAL PROJECTS

- Teaching Methodology & Lesson Planning (IT Subjects) – Designing lesson plans and curricula for programming and digital literacy (e.g., introducing children to coding through visual tools and Python algorithms).
- Interactive Educational Content Creation – Developing digital quizzes, presentations, and practical exercises that foster logical thinking and teamwork among students.
- E-Learning & CMS Systems – Practical experience with distance learning platforms and Content Management Systems (WordPress), directly applicable to the digitalization and modernization of classroom instruction.
- Extracurricular Projects – Simulating a real-world business environment through the project "Business Plan for a Healthy Food Store," ideal for establishing cross-curricular links between IT and entrepreneurship in high schools.

PROFESSIONAL & PEDAGOGICAL SKILLS

- Methodology & Pedagogy: Constructivist teaching approach, instructional differentiation and individualization (tailoring coursework for both students with learning difficulties and gifted students), student progress tracking and evaluation, mentorship.
- Digital Teaching Tools: Advanced proficiency in the Microsoft 365 ecosystem (Word, Excel, PowerPoint, Teams), data visualization tools (Power BI, Canva), and interactive lecture creation software.
- Technical IT Knowledge for Instruction: Programming languages (Java, Python, C/C++/C#, JavaScript), databases (SQL, MySQL, Oracle), and web design (HTML, CSS).
