ABOUT ME

Master of Information Technologies with a strong focus on frontend development, database design, and Power BI analytics. Through academic projects and practical industry experience, I have developed solid skills in working with modern JavaScript frameworks (Angular, React) and SQL databases. Highly motivated to work in dynamic IT environments, contribute to agile teams, and solve real-world business challenges.

PERSONAL SKILLS

- Analytical thinking and complex problem-solving
- High adaptability to new technologies
- Clear and professional communication
- Teamwork and collaboration (Git/GitLab)

COURSES

- freeCodeCamp: Relational Database V8 (2026), Legacy Responsive Web Design V8 (2026)
- Kamster d.o.o.: SQL Programming, Microsoft Power BI, Excel & VBA (2024–2025)

LANGUAGES

- English | Intermediate (B2)
- Italian | Elementary (A2)

DRIVING LICENCE

- Category B

WORK EXPERIENCE & INTERNSHIPS

Software Developer

Docus | 29.04.2025 – Present

- Active participation in the development of desktop and web applications using Angular and Node.js technologies.
- Implementation of responsive frontend components and user experience (UX) optimization.
- Development of backend functionalities.
- Skills & Environment: Full-stack approach, agile development, and team collaboration using Git under the mentorship of Marko Bogdanović.

Frontend Developer

Croonus | 01.08.2024 – 31.08.2024

- Worked on the frontend development of an e-commerce platform for online clothing retail.
- Built a modern, responsive user interface (UI) using advanced CSS/HTML and JavaScript structures.
- Collaborated with the team to optimize website performance (UX) under the mentorship of Željko Glišov.

TECHNICAL SKILLS

- Frontend & Web: HTML5, CSS3, JavaScript (ES6), Angular/AngularJS, React.js, Bootstrap, PHP (OOP)
- Databases & Analytics: MySQL, MS SQL Server, Oracle DB / APEX, Firebase, Power BI, DAX
- Programming Languages: Java, Python, C, C++, C#, Kotlin

PROJECTS

- Power BI Data Analytics – Created interactive business reports, performed data modeling, and applied DAX language to support key decision-making processes.
- Oracle APEX Application – End-to-end design of a relational database and development of the accompanying web application within the Oracle APEX environment.
- Hospital Management System – Developed a three-tier software solution with a clear separation of the presentation, logic, and data layers (Java).

EDUCATION

Master of Information Technologies

Faculty of Technical Sciences, University of Kragujevac | 2024 – 2025

- Focus: Web mining, advanced algorithms, modeling, software quality management, HCI (Human-Computer Interaction).

Bachelor of Science in Information Technologies

Faculty of Technical Sciences, University of Kragujevac | 2020 – 2024

- Focus: Object-oriented programming, databases, mobile and web application development.
